Dear Hiring Team,

I am writing to apply for the Software Engineer, New Grad 2022 position with Neeva. I am in my final year of education at Illinois Institute of Technology where I have been working towards my Master of Science degree in Computer Science. I expect to graduate in May 2022 and am therefore eager to secure an exciting position in your company.

My curriculum comprises courses like Advanced Operating Systems, Advanced Database Optimization, Design and Analysis of Algorithms and, Cloud Computing. These have assisted me in broadening my knowledge while showing me the diverse side of Computer Science that I find fascinating.

I have a total of 6 years of software engineering and data science experience. While working as a Data Scientist at HP, I gained substantial knowledge in implementing and deploying various Machine Learning models along with architecting MLOps pipelines and frameworks. I believe in being a team player and have the ability to follow directions as well as to lead the team to ensure the projects are handled professionally.

I am confident that I would be an asset to Neeva, and I hope to hear from you soon.

Sincerely,

Ayush Garg
